

About 760 officials trained by the NAC within anti-corruption activities carried out in Chisinau, Hincesti, Straseni, Calarasi, Comrat and Anenii Noi

The National Anti-corruption Centre (NAC) continued to conduct campaigns to promote integrity in public institutions. In total, 17 training sessions were organized during this period, in which 760 people participated.

The “Integrity for a Safe Society” campaign continued in nine structures of the Ministry of Internal Affairs of the Republic of Moldova: the General Inspectorate of Carabinieri, the Central Regional Directorate of the IGC, the Information Technology Service, as well as the police inspectorates in Hincesti, Straseni, Calarasi, Comrat, Anenii Noi and the Police Directorate of the Gagauz Autonomous Region. The initiative aims to promote integrity as a pillar of good governance within the Ministry of Internal Affairs, contributing to the consolidation of an institutional climate based on ethics, responsibility and transparency.

In parallel, as part of the “Integrity for Health” campaign, the NAC officers and anti-corruption volunteers discussed with medical staff from health centers in Hincesti, Straseni, Calarasi, Comrat and Anenii Noi about the importance of integrity in the medical system and the prevention of corruption in the exercise of professional duties.

The promotion of an organizational culture based on integrity was also addressed during a training for employees of the Moldovan Institute of Standardization, where ethical standards and principles of good governance were highlighted through dialogue and practical examples.

At the same time, anti-corruption officers participated as trainers in a specialized course for ministers and state secretaries, organized by the National Institute of Public Administration and Management, dedicated to strengthening integrity standards at the level of management positions in public administration.

These actions are part of the NAC's ongoing efforts to promote a culture of integrity, strengthen corruption prevention mechanisms, and involve public institutions and society in building a climate based on transparency, accountability, and fairness.
